    </header>

    <main>
        <dl>
            <h2>Introduction:</h2>

            <dd>The purpose of this project is to develop an e-commerce furniture
shop that allows users to browse,
                select, and purchase furniture items online. The shop will
feature a variety of furniture items,
```

```
                including sofas, chairs, and tables. Users will be able to create
an account, add items to their cart,
                and checkout using a secure payment gateway. The shop will be
built using HTML, CSS, JavaScript, PHP,
                and Laravel.</dd>

        <h2>Actors:</h2>
        <dd>
            The main actors in this project are:
            <ol>
                <li> <strong>Customers:</strong> Customers will be able to
browse the shop, view product details,
                    add items to their cart, and checkout. They will also be
able to manage their account
                    information and order history.

                </li>
                <li>
                    <strong>Administrators: </strong>Administrators will be
able to manage product listings, orders,
                    and customer information. They will also be able to
generate reports and manage the overall
                    functionality of the shop.
                </li>
            </ol>

        </dd>
        <h2>Modules:</h2>
        <dd>
            The main modules of this project are:
            <ul>
                <li><strong>Product Catalog:</strong> This module will allow
customers to browse and search for
                    furniture items. It will also display product details,
including images, descriptions, and
                    pricing.</li>
                <li><strong>Shopping Cart:</strong> This module will allow
customers to add items to their cart and
                    manage their cart contents. It will also calculate
shipping costs and taxes.</li>
                <li><strong>Checkout: </strong>This module will allow
customers to enter their shipping and billing
```

```
                        information and select a payment method. It will also
process payments and generate order
                        confirmations.</li>
                    <li><strong>Account Management:</strong> This module will
allow customers to manage their account
                        information, including their address, contact
information, and order history.</li>
                    <li><strong>Admin Dashboard: </strong>This module will allow
administrators to manage product
                        listings, orders, and customer information. It will also
provide reporting and analytics tools.
                    </li>
                </ul>

            </dd>
        </dl>

    </main>

Furniture Shop

Introduction:

The purpose of this project is to develop an e-commerce furniture shop that allows users to browse, select, and purchase furniture items online. The shop will feature a variety of furniture items, including sofas, chairs, and tables. Users will be able to create an account, add items to their cart, and checkout using a secure payment gateway. The shop will be built using HTML, CSS, JavaScript, PHP, and Laravel.

Actors:

The main actors in this project are:

1. **Customers:** Customers will be able to browse the shop, view product details, add items to their cart, and checkout. They will also be able to manage their account information and order history.
2. **Administrators:** Administrators will be able to manage product listings, orders, and customer information. They will also be able to generate reports and manage the overall functionality of the shop.

Modules:

The main modules of this project are:

- **Product Catalog:** This module will allow customers to browse and search for furniture items. It will also display product details, including images, descriptions, and pricing.
- **Shopping Cart:** This module will allow customers to add items to their cart and manage their cart contents. It will also calculate shipping costs and taxes.
- **Checkout:** This module will allow customers to enter their shipping and billing information and select a payment method. It will also process payments and generate order confirmations.
- **Account Management:** This module will allow customers to manage their account information, including their address, contact information, and order history.
- **Admin Dashboard:** This module will allow administrators to manage product listings, orders, and customer information. It will also provide reporting and analytics tools.
